Master the Data Foundation: Introduction to SQL Databases (2025)

STRUCTURED FOR SUCCESS

BUILT-IN PRE- & POST-ASSESSMENTS

Gauge progress and validate skill retention before and after the course.

9 COMPREHENSIVE MODULES

Covers full database lifecycle: Data Modeling, Normalization, SQL Server 2025, PowerShell.

STRUCTURED MODULE REVIEWS

Dedicated Review and Q&A sections for each module to clarify topics with instructor.

FLEXIBLE DELIVERY OPTIONS

STANDARD ILT

Traditional three-day instructor-led pace.

BOOTCAMP MODE

1 2 3

Intensive format for accelerated skill acquisition.

AFTERNOON CAPSTONE LABS

Daily 60–90 minute complex, scenario-driven labs integrating skills from all modules.

SEAMLESS BLENDED LEARNING

Easily combine with other modules like 65316A.

ADVANCED LEARNING ENVIRONMENT

HANDS-ON SQL SERVER 2025 LABS

2025

Practical experience with T-SQL, relationship design, and performance optimization.

CLOUD-READY LAB SETUP

Azure Portal-hosted; only a modern web browser needed—no local software.

POST-CLASS LAB ACCESS

SCRIPTS

Receive scripts to recreate the lab environment after the course ends.
