COURSE 65315A

Introduction to SQL Databases (2025)

The Modernization of 55315A

Executive Summary

The 65315A three-day instructor-led course provides a foundational update for the SQL Server 2025 era. Designed for beginners, programmers, and IT professionals, it covers fundamental database concepts, T-SQL mastery, and modern administration using the latest tools.

Foundational Standards

Fully updated to meet the latest standards for SQL Server 2025 training. Provides a structured path for entry-level professionals to master relational database principles and core management tasks.

Proven Educational Flow

Maintains the successful pedagogical structure of the 55315A courseware. This continuity ensures that instructors can focus on new 2025 features while relying on a stable, logical delivery flow.

ILT / Bootcamp Facilitation

Combines traditional Instructor-Led Training with an intensive bootcamp mode. Expert facilitators guide students through complex hands-on labs, ensuring theoretical concepts translate to practical skills.

Automation & Innovation

Introduces PowerShell for SQL Server automation and provides an overview of 2025-specific innovations, including vector database capabilities and enhanced temporal tables.
